Subject: Question -- redevelopment program

Hi Carla,

A resident in the Superfund site told me she will be able to have her windows replaced because

of a redevelopment grant program offered through the city. A contractor found lead dust around her windows and lead-based paint on the window. She said she was told that the windows will not be included in the grant, but will be replaced separately because she's in the Superfund site.

Do you have an information on the redevelopment grant program or whether residents might be able to apply for funds to help remediate lead hazards in their homes?

Thanks,

Sarah
